Side-event Workshops:

World Water Forum 6 TSG 7.2 preparatory process meeting:

Management of drinking water supply and sanitation utilities Thematic: Tariffs, Taxes and Transfers (the "3Ts")
in the European Water Sector September 29th -9 am

Second workshop of the World Mediterranean Economic Foresight Institute (IPEMED)

Organized in the perspective of the World Water Forum 2012 :

"Implementation of a Mediterranean Water Agency guided by integrated water resources management principles"
27th September from 9 am to 3 pm

The **International Network of Basin Organisation (INBO)** was established in 1994. INBO goal is to promote an integrated water resources management at the level of river basins and aquifers as an essential step for a sustainable development. To accomplish this objective INBO seeks to develop lasting relationships among water management organizations. Furthermore, INBO objectives comprise the exchange information and the implementation of water management tools, as well as the development of information and training programs, the encouragement of population's awareness and the promotion of integrated water resource management in national and international programs. INBO has 188 member organizations and permanent observers in 68 countries.

EUROPE-INBO is a group of European basin organizations concerned with the implementation of the water framework directive (WFD) and integrated water resources management. At present, 110 river basin districts are established across the EU, Switzerland and Norway, of which 40 are transboundary.

MENBO is the Mediterranean Network of Basin Organisations, established as a regional network on 2002. MENBO members come from Albania, Bosnia Herzegovina, Cyprus, France, Greece, Israel, Italy, Jordan, Lebanon, Libya, Macedonia, Morocco, Palestine, Portugal, Romania, Spain and Turkey.

The EUROPE-INBO Conference and MENBO's General Assembly will be an opportunity to discuss solutions for the management of river basins, aquifers and coastal waters in a changing world impacted by social and political challenges. A session focused on the preparation of the World Water Forum 2012 (Marseille-France) will be organized under the auspices of OIEAU. Furthermore, the organization of a workshop on Environmental Liability Directive will be also considered.
